

Jr. High or Middle School Introduction Class

Several school districts currently allow 7th graders to take the

Introduction to World Languages class. Here is the course description:

41991 World Language Exploration – This course is designed to provide students with a rotating introduction to languages offered at their school. Focusing on listening and speaking skills. The course will expand student knowledge of other languages and cultures. It will also aid them in making more informed decisions about their future language study.

This class allows the foreign language teachers to give the 7th grade students a brief introduction to the foreign languages taught at the school. They rotate from teacher to teacher throughout the semester. Some students learn that they may have an aptitude for one language over another one.

In order to encourage more kids to take the elective class, we post posters advertising the class in all the 6th grade classrooms that will feed into our school. We put the posters up the week before it is time for students to register. We also send home a letter with the registration material telling the parents about the class and inviting the students to take the class.
